Core Competencies

EMG Intellect can help the Defense Logistics Agency (DLA), Department of Veterans Affairs (VA), and other federal agencies that may need help in research, procurement of parts and supplies in the Transportation Department with a wide range of heavy equipment

- repair,
- maintenance, and
- management.

The company also specializes in unique, flexible, and patented outdoor canopies that can be used for camping, utility showers, or as a privacy enclosure. Our units a

- multi-purpose,
- easily set-up and transported by one-person,
- built with trusses that can support more than 150 pounds,
- light and portable, and
- easily fit in the trunk of a compact car.

Differentiators

- 40 years of heavy transportation (or vehicle) equipment maintenance experience:
 - 20 years military and
 - 20 years as civilian
- Military supply and commercial system experience researching and ordering parts from various commercial sources
- Manages listings of critical parts for each end item for warranty and ease of reordering
- Maintains comprehensive logs and records for serviced and repaired equipment
- Received two utility patents for Emergency Garage & Foldable Frame

Experience

Invention | Product Development

Utilizing customized utility patented inventions of products that solve problems encountered while camping with family and friends in European and United States (U.S.) campgrounds. Conceived and developed solutions for outdoor activities challenges. Developed and submitted two patent applications that were approved by the U.S. Patent and Trademark Office. Created prototypes and oversaw mold and final product development.

Geoffrey A. Ampoyo, (571) 245-1958, geoff@emgintellect.com

Heavy Equipment Maintenance

Manage and maintain 16 forklifts, 3 High Lifts, cranes, various vehicles, and small engines of a small construction company at approximately 150 construction sites. Successfully keep critical equipment in operating condition to meet the scheduled requirements of complex construction activities. Manage parts and supplies and actively track inventory as well as equipment records. Create and execute routine maintenance schedules. Manage maintenance fiscal resources.

Bret Shepard, (703) 830-0916, bshep0916@aol.com

(Medium) Equipment Maintenance

Managed, maintained, and repaired concrete equipment such as high-volume air compressors for jack hammers, portable generators, cement surface finishers, Bobcats, backhoes, dump trucks, and roll offs.

Mario Rebelo, (703) 330-1400, springvalleyconc@aol.com

United States Air Force (USAF)

Heavy Equipment Shop Supervision, Aviano Air Base, Italy
